Professional Summary

- Experienced Senior Full Stack Developer with over 11 years of expertise in designing and delivering large-scale, enterprise-grade solutions, heavily leveraging **SAP ABAP, SAP BTP, SAP CAPM, SAPUI5, SAP Fiori, Java, Spring Boot, Node.js, and RESTful APIs**.
- Strong proficiency in modern frameworks and technologies, including **ReactJS, JavaScript, TypeScript and Microservices architecture**.
- Possess a robust background in Java and related technologies, including **Spring Boot** and **Hibernate/JPA**, for building high-performance, enterprise-grade software solutions.
- Strong track record in building **cloud-native applications with SAP CAPM**, automation frameworks, and modern UI/UX interfaces.
- Known for a solution-driven approach, deep technical acumen, and effectively leading cross-functional teams in global delivery environments.
- Developed efficient, scalable web applications using microservices architecture, RESTful web services, **SAP CAPM services**, and integrated CI/CD pipelines for streamlined delivery.
- Willing to lead large-scale teams or take a hands-on role in delivering highly challenging projects.

Technical Skills

UI Frameworks: Angular, React.js, Vue.js, Stencil.js, JavaScript, TypeScript, SAPUI5, SAP Fiori

Backend Frameworks / Server-Side: SAP CAPM, Java, Spring Boot, ABAP, Node.js, PHP

Middleware & APIs: Express.js, Microservices, RESTful API, OData (CAPM-based)

Database Management: MongoDB, PostgreSQL, MySQL

Cloud & Platforms: SAP BTP, SAP HANA, AWS, SAP CAPM

Testing & DevOps: Selenium, Junit, Mockito, Jasmine, Karma, JIRA, Git, Jenkins.

Professional Experience

Senior SAP Consultant | Dubai International Financial Centre

Nov 2025 – Present | Dubai, UAE

Senior Full Stack Developer | SAP Labs India Pvt. Ltd.

May 2023 – Sep 2025 | Bengaluru, India

- Leading full-stack development of **SAP BTP + CAPM** applications under Data Provisioning (DP) and Insights to Action (I2A) frameworks using **Spring Boot and React.js**, driving AI-powered insights, metadata governance, and multi-source data integration across the XALM landscape.
- Designed and optimized a reusable Data Modeling engine using **Node.js, CAPM services and SAP HANA**, enhancing automation and strengthening metadata governance.
- Engineered UUID-secured **RESTful services** and high-throughput bulk APIs integrated with SAP DIC Pipelines, streamlining data ingestion and boosting runtime efficiency.
- Delivered a role-based metadata management UI using **SAPUI5 and Fiori** powered by **CAPM OData services**, enhancing data discoverability, glossary tagging, and collaboration between business and technical users.
- Developed interactive simulation tools and dashboards in **React.js**, enabling authors to validate data configurations pre-execution.
- Engineered the I2A microservice for real-time ingestion and recommendation generation, enabling seamless flow of AI-driven insights into visualization and action-tracking platforms.

Projects

SAP Labs India | June 2023 – September 2023

Project: DP Framework – Data Provisioning Authoring

Used Technologies: Spring Boot, React.js, SAP HANA, RESTful APIs, SAP BTP, SAP CAPM, CI/CD Pipelines.

- Enhanced the Data Provisioning Framework for seamless integration into the XALM platform, serving Service Execution Engine (SEE) and Insight to Action (I2A).
- Built the Data Provisioning Authoring tool for self-service configuration, modeling, and management of provisioning requests from SAP Data Intelligence Cloud (DIC) and ISD Hub.
- Integrated with DIC Metadata Explorer API for real-time dataset discovery and metadata retrieval.
- Delivered advanced data modeling features, including dataset merge logic, output customization, and dynamic/static parameter configuration.
- Secured configuration persistence in HDI Containers with UUID-based tracking and developed backend services for metadata lookup, request retrieval, and status checks.

SAP Labs India | *October 2023 – January 2024*

Project: [DP Framework – Data Provisioning Runtime](#)

Used Technologies: Spring Boot, React.js, SAP HANA, RESTful APIs, SAP BTP, SAP CAPM, CI/CD Pipelines.

- Developed the Data Provisioning Runtime, a secure backend API for parameter-driven data retrieval from external sources like SAP DIC.
- Implemented UUID-based APIs aligned with DP Authoring configurations, integrating with DIC Pipelines for real-time extraction from multiple systems.
- Built scalable services for single/bulk data retrieval, configuration file generation, and multi-tenant status tracking.

SAP Labs India | *February 2024 – May 2024*

Project: [DP Framework – Data Catalog UI](#)

Used Technologies: Node.js + Express.js, SAPUI5, SAP HANA, RESTful APIs, SAP BTP, SAP CAPM, CI/CD Pipelines

- Designed and implemented a Data Catalog UI for metadata tagging and business glossary management, improving discoverability and governance.
- Integrated with SAP DIC for secure connections and policy management.
- Delivered role-based access features for technical users, editors, and admins, enabling dataset publishing, glossary management, and metadata exploration.

SAP Labs India | *October 2024 – January 2025*

Project: [DP Framework – Simulation Viewer](#)

Used Technologies: Node.js + Express.js, SAP Fiori Elements (frontend), SAP HANA Cloud, OData Services, SAP BTP.

- Developed a Simulation Viewer UI for validating and reviewing modeled data requests before consumption.
- Provided complete request metadata visualization, including dataset details, filters, and output definitions.
- Added and configured a Launchpad tile “Data Request Browser” for quick role-based navigation.

SAP Labs India | *February 2025 – April 2025*

Project: [Insights to Action \(I2A\) – Services](#)

Used Technologies: Spring Boot, SAP HANA, OData Services, SAP BTP, SAP CAPM, CI/CD Pipelines

- Built the I2A Backend Service for raw data ingestion, AI insight generation, and recommendations within the XALM platform.
- Integrated multiple data channels (UI uploads, automated collectors, APIs, DP pipelines) and structured HDI tables for raw data, findings, and recommendations.

- Enabled downstream integration with Service Results and Issue & Action Management modules.

SAP Labs India | *May 2025 – Present*

Project: *Insights to Action (I2A) – UI*

Used Technologies: Node.js + Express.js, React.js, SAP HANA, OData Services, SAP BTP, CI/CD Pipelines

- Developed an interactive UI for visualizing raw data, AI findings, and actionable recommendations via SAP Analytics Cloud or dedicated screens.
- Integrated with Service Results and Issue & Action Management for insight-driven actions.
- Ensured seamless integration with I2A backend services and HDI container data structures.

Prime Consultant II | **Veritas Prime Labs Pvt. Ltd.**

Aug 2021 – May 2023 | **Hyderabad, India (Remote)**

- Designed and delivered multiple **SAP BTP/SAP SuccessFactors–integrated** applications, including E-Calibration—a grid-based performance review tool built with React.js, JavaScript, and Spring Boot—and Mass Changes, a Node.js and React.js platform for HR data updates.
- Led the architecture of **Data Service Hub on SAP BTP**—a multi-tenant, database-agnostic integration layer built with Java, Spring Boot, and Hibernate/JPA, supporting SAP/ECP endpoints to accelerate enterprise client onboarding.
- Built **Help My Cloud on SAP BTP**, a cloud-based ticketing system with SLA-backed support tiers using SAPUI5 (frontend) and PHP (backend), enabling flexible support models and reducing onboarding time by 25%.
- Spearheaded the UI Excellence and Best Practices team at Veritas, driving adoption of Smart Controls and modular design through POCs, code reviews, and developer enablement, aligned with **SAP BTP UI/UX extension practices**.
- **Enhanced operational transparency and user personalization** through the *Smart Employee Viewer*—a SAPUI5 Smart Control app with dynamic filters and variant management.

Senior Consultant | **Vistex Asia-Pacific Pvt. Ltd.**

Jul 2015 – Jul 2021 | **Hyderabad, India**

- **Core member of the Agriculture Business Suite (ABS) product team**, leading end-to-end delivery of three modules and two enterprise-scale implementations for clients including PepsiCo and Dole Plc, using **Angular** and **Node.js** with **OData Services** for seamless integration.

- **Sole developer of the ABS Mobile solution** for 3+ years, built with **SAPUI5** and **JavaScript**, supporting global rollouts, user onboarding, and UAT training across multiple geographies.
- **Introduced Katalon for automation testing**, significantly improving regression coverage and boosting release confidence across ABS landscapes.
- **Integrated SAP modules** with **SAP Fiori** frontends and **OData Services** to deliver ERP solutions tailored to complex agribusiness workflows, driving higher system adoption and improved ROI for clients.

Education

Bachelors in Computer Science Engineering,

Rajiv Gandhi University of Knowledge Technologies (RGUKT) | GPA: 76% | 2015

Certifications

SAP Certified Development Associate – SAP Extension Suite
